## Proposed Amendment

TSXV is seeking to introduce an enhancement to its current opening auction by introducing a new Limit on Open order type. Limit on Open "LOO" orders will trade in the opening auction, with any unexecuted portion being cancelled immediately before the commencement of the continuous trading session.

To implement this enhancement to TSXV opening auction functionality, an amendment to the TSX Venture Exchange Rule Book (the "TSXV Rules") is needed to allow for the cancellation of LOO orders at the end of the opening allocation, before continuous trading commences (the "Proposed Amendment").

Please see Appendix A for a blackline of the Proposed Amendment and Appendix B for a clean version of the Proposed Amendment.

#### Rationale

Currently, if a limit order is sent to TSXV for execution in the opening auction, any portion of the order that was not filled at the opening remains in the book for execution in the continuous trading session. The LOO order type will provide additional options for participants to manage their opening orders by specifying that the order is to participate only in the opening auction, subject to its indicated limit price. The order will have the same standing in the opening allocation priority as a regular limit order participating in the opening auction.

#### **Expected Date of Implementation**

The Proposed Amendment and related functionality changes are expected to become effective in Q3 2017.

## **Expected Impact**

The LOO order type will provide additional options for participants to manage their opening orders by specifying that the order is to participate only in the opening auction, subject to its indicated limit price.

Expected Impact of Proposed Changes on the Exchange's Compliance with applicable Securities Law

The proposed changes will not impact TSXV's compliance with applicable securities law and in particular the requirements for fair access and maintenance of fair and orderly markets.

Estimated Time Required by Members and Service Vendors to Modify Their Own Systems after Implementation of the Proposed Amendments

This change is an extension of current functionality and behavior, by specifying an additional
